DETAILED ACTION

Claim Objections

1. Claims 2 and 3 are objected to because of the following informalities:
"wherein the step c" and "wherein the step d" should be deleted and placed with
- further- . Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Fujisaki et al U.S. Patent Number 6,466,574.

Re Claim 1, fig. 4 teaches an access point 260 that replicates and tags (classifying the datagrams) the datagrams 120 and transmits the replicated datagrams over paths 275 A-C (redundant transmission of datagrams), wherein the datagrams are inherently received from a physical layer (See col. 6, lines 28-58). Further teaches the system of fig. 4 supports PPP and IP protocols (See col. 3, lines 48-50). Hence, the source 131 is PPP sessions to destination 133 over the redundant paths 275 whereby the destination processes the received replicated datagrams and selects one the processed datagram to be transmitted to the destination network.

Re Claims 2, 6, refer to Claim 1, wherein PPP frames are encapsulated into TCP/IP packet format from the physical layer.

Re Claims 3, 7, refer to Claim 2, wherein the PPP protocol inherently supports error detection (deleting the datagram having an error)

Re Claim 4, refer to Claim 1, wherein the received/processed datagrams are transmitted to the network layer of the destination.

Re Claim 5, refer to Claim 1, wherein it is inherent to include plurality of management planes at the destination access point to process the datagrams over the redundant paths. Furthermore, the management planes are located in the upper layer of the PPP sessions.

Response to Arguments

4. Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 2663

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
